## Nation mourns shuttle tragedy

CAPE CANAVERAL, Fla. (AP) — A catastrophic explosion blew apart the space shuttle Challenger 75 seconds after lift-off Tuesday, send-

ing schoolteacher Christa McAuliffe and six NASA astronauts to a fiery death in the sky eight miles out from Kennedy Space Center.

"We mourn seven heroes," said President Reagan. "The accident defied quick explanation, though a slow-motion replay

seemed to show an initial explosion in one of two solid-rocket boosters igniting just after the external tank had torn. The tank burst into a ball that destroyed Challenger high above the Atlantic while crew families and NASA officials watched in despair from the Cape.

Other observers noted that the boosters continued to fly crazily through the sky after the explosion, apparently under full power, indicating that the fatal explosion might have originated in the giant tank itself.

"We will not speculate as to the specific cause of the explosion based on that footage," said Jesse Moore, NASA's top shuttle administrator. National Aeronautics and Space Administration officials said the organization's investigating board and committee said it will take a "careful review" of all data "before we can reach any conclusions."

Never before in 56 manned space missions had Americans died in flight. John Glenn, the former astronaut, recalled that three astronauts died in a launch-pad training accident 19 years ago and said the history of pioneers is often one of triumph and tragedy.

The explosion followed an apparently flawless launch, delayed two hours as officials analyzed the danger from icicles that formed in the frosty Florida morning along the shuttle's path.

"We were not signs of abnormalities on the screens" as flight controllers monitored Challenger's lift-off and ascent, a source said. The source, at the Johnson Space Center in Houston, said the blast occurred "unexpectedly and with absolutely no warning."

"We have a report from the flight dynamics officer that the vehicle has exploded. Flight director confirms that," said NASA's Steve Nesbitt.

Mission Control reported that there had been no indication of any problem with the three shuttle engines, its twin solid boosters or any other system and that the shuttle just suddenly blew apart at 50 miles high and 3 miles from the edge of space. Cameramen. Ninety minutes after the accident, controllers were still at their consoles, solemnly examining flight data.

Flags at Cape Canaveral were lowered to half-staff. The countdown clock that marks the progress of the mission continued for the moment.

Reagan, in an Oval Office address after he postponed his State of the Union message because of the tragedy, reaffirmed his commitment to the shuttle program and said, "The future doesn't belong to the fainthearted, it belongs to the brave."

"We will continue our quest in space," he said. "There will be more shuttle flights and more shuttle crews and, yes, more volunteers, more civilians, more teachers in space."

He added, "Nothing stops here."

NASA delayed its announcement that there appeared to be no survivors until it had conducted search and rescue efforts, and before Moore's statement, it seemed possible only one could have survived such a catastrophe.

The crew included McAuliffe and six NASA astronauts: commander

The Space Shuttle explodes shortly after lift-off from Kennedy Space Center early yesterday with a crew of seven aboard. NASA officials say there were no apparent problems at the time of launch.

Francis R. Scobee, 46, pilot Michael J. Smith, 40; Judith Resnik, 36; Ronald E. McNair, 35; Ellison S. Onizuka, 39; and Gregory B. Jarvis, 41.

"I regret that I have to report that based on very preliminary searches of the ocean where the Challenger impacted this morning, these searches have not revealed any evidence that the crew of Challenger survived," Moore, NASA associate administrator, said at a midmorning news conference.

Col. John Shultz, director of Defense Department contingency operations here, said a search armada of helicopters, ships and planes had spotted several pieces of debris floating in the Atlantic.

"We have seen several pieces, which looked to be about five or 10 feet long and about one foot wide," he said. "The debris will be recovered and brought to a hangar at nearby Patrick Air Force Base."

## Students, teachers react

RACHEL COLLIER  
City Editor

Students and teachers from all around Utah reacted with shock and horror as news of abrupt end to the 10th mission of the space shuttle Challenger, carrying the first schoolgirl into space, filtered out.

A group of 90 fifth-graders at Westridge Elementary School were watching the broadcast of the accident at the time of the explosion, and one of the students, a 10-year-old girl, didn't realize what had happened. "It really hurt when the explosion happened," she said. "I can't keep from crying, and when the kids saw them realize that something really bad had ended."

She said the children were all quiet for the rest of morning, talking among themselves in small groups and speculating about what had happened. The group is very current-event conscious. We're a current-event book every week, so they're following the space program very closely, usually because a teacher was on board," Brown

in Decker, a teacher at Timp View High, said was watching the lift-off on a small T.V. during

her preparation period when she saw the explosion. She immediately went to the next-door history class, and the students crammed in her room to watch.

This sort of disbelief was the general reaction among all the students in the county. Collette Thomas at Provo High said, "Most of the students were really shocked. We always think of the space program as being really safe, so when something like this happens, it is even more of a shock."

Lisa Preston, who teaches at Park City High, was one of 114 teachers chosen as a contender for the shuttle spot from 11,000 applicants from across the country.

She said her students' first reaction was "We're glad it wasn't us." "I think the students were shocked a little to realize that it can happen," she said. "They all think the space program is basically without error, since they've never seen any problems before."

Preston said she hopes the program will go on, and that another teacher will go into space. "We've got to let people know how important the good aspects of the program have been," she said.

"You can get killed walking across the street. If you worry about that, you could lock yourself in a little box, and still die when your oxygen ran out."

She said the children were all quiet for the rest of morning, talking among themselves in small groups and speculating about what had happened. The group is very current-event conscious. We're a current-event book every week, so they're following the space program very closely, usually because a teacher was on board," Brown

in Decker, a teacher at Timp View High, said was watching the lift-off on a small T.V. during

We have to take chances now and then to accomplish what we want to do," she said.

In another interview with *The Daily Universe*, Preston said she thought a teacher should go into space for a variety of reasons.

"Teachers have a big impact on a lot of kids — we're a very real person to them. That makes it easier for kids to dream about going into space themselves; their world is out there," she said.

Senator Jake Garn, R-Utah, expressed his sorrow in news conferences in Washington and Florida. As a recent member of a space shuttle mission, Garn said he had a particularly close attachment to the space program.

"It's very difficult for me to talk about it because these are my friends," he said. "I knew all of them and went to school with some of them. I just send my love and condolences to all of their families."

President Jeffrey Holland said he watched with interest as the space shuttle exploded on its return to Earth.

"My thoughts were of the crew and their parents, friends and family. Our immediate reactions were human and personal; our thoughts and prayers turned towards their families," he said.

BYU's flag will be flown at half-staff tomorrow, in honor of the killed astronauts.

It was always high, he said. "I would guess the next space shuttle flight will be the safest ever." Coincidentally, Monday was the 19th anniversary of the only other accident in which American astronauts have been killed.

"The previous accident caused us to turn the place upside down," said Fletcher. "It took us 1 1/2 years to thoroughly scrub the program." "Scrubbing" means it is possible to cause for the accident to be anticipated. The scrubbing caused the program to be delayed for much longer than it was before, said Fletcher. "And up until (today) it has been fairly safe," he said.

Fletcher said the inclusion of future payload specialists would be a decision made by NASA. "If it were me, I would be a little cautious."

In interim review board has been set up to keep all information and

about the accident intact. In a few days a formal board will be called to go ahead with the action accident investigation, he said. Late last night KSL-TV news reported that Fletcher may be asked to join the investigating board.

Fletcher said the accident will probably cause two major setbacks — the delay of future launches by about two to three months, and the loss of a much needed orbiter which could delay the whole program by up to two years.

Fletcher said the inclusion of future payload specialists would be a decision made by NASA. "If it were me, I would be a little cautious."

In the early planning stages of the civilian space program some congressmen had misgivings about reporters going to space.

ABC correspondent, Lynn Sherr, favors the program. According to an Associated Press report she said that reporters are not frivolous. "There is a need for people to be in space," she said.

BYU students were stunned by the tragedy, but agreed the space program should continue to send civilians into space.

"This is very sad," said Craig Smith a senior from Provo, majoring in French. "It is a shame this disaster had to happen with the first civilian in space on the flight. I think they should still continue to allow civilians to travel in space. More people died discovering California than discovering space."

## Garn confident in space program

WASHINGTON (AP) — A shaken Sen. Jake Garn, a shuttle astronaut himself last April, said Tuesday that he still had "great confidence" in the space program despite the explosion that apparently killed seven astronauts, and added that he felt safer in the air than on a freeway.

"It's very difficult for me to talk about it," Garn said in an interview broadcast by Cable News Network about two hours after the latest shuttle flight exploded shortly after liftoff.

"Mike Smith, the pilot, was my mother hen's first month that I trained to go to class and help brief me," said Garn, a Utah Republican who eight months ago became the first lawmaker to fly in space.

He said he still had "great confidence" in the space program, but added that "obviously we should not fly until we have determined the cause of this particular failure."

"We should proceed with the program, and that would include the civilian

in space program as well," he said.

Asked whether he was briefed on the dangers of space flight when he was training, Garn said that "in my own case, having flown more than 10,000 hours, I was certainly aware that there are dangers in flying."

"However, I still feel very strongly that I'm much safer flying an aircraft than any day that I'm in the Capitol Building."

He said he didn't think the accident stemmed from carelessness on the part of NASA officials to get the shuttle off after several delays.

"I think we need to look at all the successes, the remarkable safety record that the space program has had, the benefits that come from it," he said.

"The crew members that I knew so well, I would expect that they would want us to go ahead with the space program after we had gone through the proper investigation and analysis and know what happened."

## Former director expresses sorrow

MANDY JEAN WOODS  
MARK FLETCHER  
Editor

A absence of the present administrator of NASA during this time of which could impact the investigation of the accident of the space shuttle, a past director told *The Universe* in a telephone interview from Pittsburgh yesterday.

Former Director of NASA 1973-1977 and a member of the University of Utah, said Beagle's leave of absence from because of a grand jury indictment comes at a critical time. Beagle indicted by a grand jury Dec. 2 use of his role in his former posi-

tion as an officer of General Dynamics. William R. Graham, acting administrator of NASA, also absent for the launch, was in Washington trying to raise funds for the space program.

Fletcher expressed his shock and sorrow at the loss of lives. "It was a terrible tragedy. For the families watching it happen must have been hard." He said he delayed watching the tape because he was being contacted by NASA because he didn't want to see the accident.

The effects of the 1967 tragedy, in which three astronauts died on the launch pad, was still in evidence when he became director of NASA, and concerned about accidents occurring

was always high, he said. "I would guess the next space shuttle flight will be the safest ever." Coincidentally, Monday was the 19th anniversary of the only other accident in which American astronauts have been killed.

"The previous accident caused us to turn the place upside down," said Fletcher. "It took us 1 1/2 years to thoroughly scrub the program." "Scrubbing" means it is possible to cause for the accident to be anticipated. The scrubbing caused the program to be delayed for much longer than it was before, said Fletcher. "And up until (today) it has been fairly safe," he said.

Fletcher said the inclusion of future payload specialists would be a decision made by NASA. "If it were me, I would be a little cautious."

In the early planning stages of the civilian space program some congressmen had misgivings about reporters going to space.

# Y students can help America regain world economic lead

By DONNA R. KELLY  
University Staff Writer

Japan may be dominating the world economy today, but BYU students can play an important role in helping America regain its lead.

Ezra Vogel, one of America's prominent Japanese authorities and a professor of sociology at Harvard University, addressed the factors contributing to Japanese dominance at Tuesday's Forum on Assemblies.

Vogel is also the author of "Japan as Number One," and "Comeback," a proposed one-volume history.

Young Americans are dumbfounded by the scope of Japanese progress. "We underestimated Japan," he said.

Because of the large number of students who served LDS missions in Japan, BYU is in a unique position for making a very important contribution in America's efforts to successfully compete, he said.

"BYU is a great national resource," he said.

Japan will continue to make surprising progress in the areas of manufacturing,

the service sector, and research and development, Vogel said.

"Japan is going through a technological revolution," he said. "Automated equipment that can run through the night and outperform human assistance is being introduced very rapidly."

The Japanese do not resist the new technology as a threat to their jobs because of the country's permanent employment system, he said. A company will spend three to six months retraining a person for a new position, something which is rarely done in the U.S., Vogel said.

A high literacy rate in science and technology, along with aiding manufacturing, "Japanese students score higher in science and math than students in any other country,"

he said. "Thus, the ordinary worker is able to learn how to use the new technology and is not afraid of using computers, he said.

The Japanese have targeted the service sector as an important area for the future. Currently, Japan claims the six largest trading companies in the world and the largest trading agency, and is making tremendous gains in fashion, music, finance and consulting.

"We haven't been aware of the expansion (of Japanese service), but it's already very substantial," Vogel said.

Japan has a reputation of being an imitator in the research and development field. "They didn't think it was worth reinventing

the wheel when they could borrow it so easily," he said.

However, Japan now plans on investing 3.5 percent of their gross national product on research and development by 1990. America is expected to stay at its current rate of 2.6 percent.

"Foreigners are no longer supplying Japan with enough technology," he said. "The Japanese are concentrating their efforts in areas of considerable importance for the future."

Vogel said Americans can best respond to the Japanese by first admitting that there is a problem. Better training, and improved relations between companies and the government, and between managers and workers should be stressed more than defensive methods, such as protectionism.

In the question-and-answer session following the forum, Vogel discussed the direction BYU and other universities should be taking to prepare students for today's international economic situation.

"A training program for students and missionaries stressing high standards of English and grammar is the first step," he said.

Specialized courses in Japanese business should be expanded. "BYU is in a strong position to build these courses," he said. "Within five to ten years, BYU could have a much stronger program than any other U.S. university."

Vogel said that students interested in working in the Japanese should know the language and culture, but also have a professional degree, such as in business or engineering.

"Use the rifle-shot approach," he said. "Know what your skills are and find a company that needs your skills."

A student may also have to practice his persuasive abilities, he said. "American companies don't realize how much they need you."

EZRA VOGEL

## Mental exercises may prevent loss

STATE COLLEGE, Pa. (AP) — New results from a study of elderly people indicate that the partial loss of certain mental skills may be due more to disuse than disease and can be reversed with simple mental exercises.

A study of 229 members of Puget Sound Group Health, a health maintenance organization, found that 70 percent of those whose inductive reasoning and spatial orientation skills had declined since 1970, about 40 percent were able to recoup the losses after five one-hour training sessions.

The findings are important because "in studies of later adulthood, the assumption has been made that when the cognitive skills decline, they're irreversible," said researcher Sherry Willis, a human development associate professor at Pennsylvania State University.

The study was conducted from 1983 to 1985 by Willis and K. Warner Schiade.

Schiade began the Seattle Longitudinal Study in 1950 while a doctoral student at the University of Washington. Their results will be published later this year in the journal "Developmental Psychology," Willis said.

## Prospective candidates limited by amendment

A proposal to amend a controversial ASBYU Supreme Court ruling on the constitution was introduced during the ASBYU legislative council meeting Tuesday night.

On Jan. 22, the ASBYU Supreme Court ruled that a student must have been enrolled as a full-time student for the entire fall semester in order to run in the ASBYU student body elections.

Several prospective candidates have been affected by this ruling for reasons such as illness, missions, and lack of money to attend school during last fall semester and have proposed an amendment to change the constitution in order to allow them to run for office.

In the proposed amendment, a candidate would be eligible if he had been a member of ASBYU for one block of the fall semester immediately prior to his nomination.

Promoters of this amendment believe that a student can familiarize himself with student government in one block, and that being enrolled for the whole fall semester is not necessary.

Mike O'Neill, ASBYU attorney general, said the Supreme Court defined "semester" as a full semester. Because of this definition, full-time students who attended only one block last fall semester are ineligible to run for office.

## Orem council stalls motel

A zoning request that could result in a 10-unit motel for Orem and a proposal from a citizen group to change the form of county government were two items discussed at Tuesday's Orem City Council meeting.

A public hearing was held to discuss the rezoning of 1300 S. Main.

Keith Haines, a spokesman for the group, explained that the purpose of the group is to reorganize the form of county government.

Since the original site plan was proposed, a feasibility study has been conducted that indicates a 74-unit motel without the restaurant would be more cost effective for the present time. This recommendation came from the Architectural Coalition, which is the group working with the developer and which submitted the application with Orem.

Dale Cox, a citizen of Orem involved in the lodging industry, re-

quested that less than 50 percent of the available motel units be used.

The council moved and seconded to delay decision for at least two weeks on this proposal.

Also present at the meeting were representatives of a citizens group from the Utah County area. Keith Haines, a spokesman for the group, explained that the purpose of the group is to reorganize the form of county government.

Since the original site plan was proposed, a feasibility study has been conducted that indicates a 74-unit motel without the restaurant would be more cost effective for the present time. ## Nursing forum hosts researcher

One of the top nursing researchers in the country will be the key speaker at the 11th Annual Nursing Research Conference sponsored by the College of Nursing Thursday.

Dr. Elizabeth Geden, a registered nurse and a doctor in educational psychology, is currently an associate professor in the School of Nursing at the University of Missouri-Columbia.

Geden has received several honors and awards for her work, among them: Outstanding Young Woman of the Year and Who's Who in American Nursing.

Geden's most current research explores labor pain delivery and the alleviation of labor pains — a problem she has worked on for over seven years by simulating labor pains in non-pregnant subjects.

At the conference, Geden will give two addresses both reflecting her practical research.

She will discuss lifting and bathing techniques used in the morning lecture and preparing for labor in the afternoon session.

# New insurance trend sweeps nation, Orem

By SHELLY GOLD  
University Staff Writer

A trend that could change the way cities are insured is not only sweeping the nation, but is active in the state of Utah and the city of Orem.

There is a crisis in the entire country with insurance for cities that have been cancelled or rates being drastically increased. Senator Orrin Hatch, (R-Utah), is sponsoring a bill which is aimed at decreasing civil lawsuits against cities.

Hatch will be in Utah for a hearing in the Salt Lake City on January 29. Febr. 12, the Utah's local government officials will be able to meet with U.S. Senators on the Constitution about their problems with insurance.

One of the local officials struggling with the insurance issue is Bryce McEuen, former Orem city attorney, who was appointed executive director of the Utah Municipal Risk Management Pool in 20.

The pool of several Utah cities was organized in October after rem City was informed that its liability insurance had been cancelled. McEuen said in the past cities haven't cared about losses because insurance always covered them. Now, without that protection, many cities are finding themselves in a dangerous financial situation.

Stewart Taylor, assistant city manager of Orem, said the rem liability was actually cancelled in June. The city was stumped that to continue coverage the premiums would double and the coverage would decrease.

Cities have traditionally been a bad risk for insurance companies. In Utah, the court systems have awarded large amounts of money to people who sue cities for damages. McEuen said that recently a man in California was awarded 5 million dollars from a city after a surfing accident in an area at was marked unsafe by the city. The man sued because he said there were not enough flags.

Situations like this have caused the insurance companies to a lot of money, said Taylor. "They (the insurance companies) can't handle it anymore."

Hatch said the insurance problem is, "a crisis of catastrophic costs." Costs have risen so fast that there are cities in Utah paying as much as 400 percent more for liability coverage. When the Orem City coverage was cancelled, the administration decided to hand together with other Utah cities in the same situation and form an insurance pool.

So far 17 Utah cities have joined together, and McEuen said he anticipates between 50 and 100 more will follow suit. The whole was really " spearheaded" by Orem's city attorney, Taylor

said.

"I had talked with my boss a lot about it before anything happened," said McEuen. The idea was adopted from a group in California. "We had a lot of different ideas, but when the disaster came, it was clear."

This is one of the first organizations of this type in Utah, said Taylor. He added, "There are about 200 pools like this around the country and lots of cities are lined up to get into it."

This problem with insurance has caused problems for many cities, said McEuen. "In some parts of the country, like Nebraska, entire city councils have resigned when the city's insurance was cancelled."

A lot of city officials are afraid of being sued personally if something was to happen," said McEuen. "The whole world is getting out of hand. The world has gone crazy with everybody suing everybody."

— Bryce McEuen

Executive director of the Utah Municipal Risk Management Pool

"I have real doubts that the current system works," said McEuen. "A lot of people have suffered a lot of trouble without receiving \$15 million awards."

The pool is not only aimed at providing insurance coverage to cities, but more importantly it is concerned with helping cities to reduce insurance rates by reducing risks.

Once the reserve of money is established, said McEuen, the premiums will be based on the cities' loss record. Those cities that have higher claims will have higher premiums.

"Forming the pool doesn't solve the problem," said McEuen. "However, it does give cities a much-needed option for insurance coverage."

This project represents a new direction for cities. Cities need to change the whole attitude about insurance. "You can't cut risks if you have to do a better job about safety and prevention."

The new pool will protect about 400,000 people in Utah, which is about one-third of the state. "We want to do what is morally and ethically fair," said McEuen.

McEuen said the reason he took this job is because "the future is just starting for this thing."

## Infant's relations topic of lecture

By REBECCA BURGOYNE  
University Staff Writer

An infant's first interactions are very important to the child as it is to a normal social life, according to

Stanley Feldstein, scheduled to speak Wednesday at 7 p.m. in the sun Ballroom, ELWC. The lecture will be the first in a series on family.

Feldstein, a visiting professor at CU from the University of Maryland, Baltimore County, is currently involved in a research project on the interaction between mothers and infants.

"The Beginning of Social Relatedness: Mother-Infant Interactions" will be the title of his lecture. He has specifically studied this area in own's Syndrome infants.

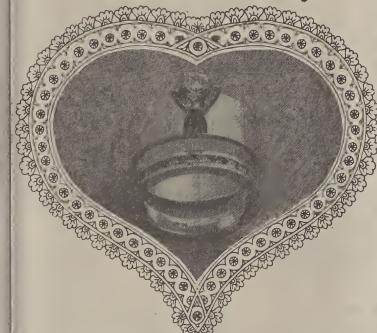

**James II not local yokel; he also spent time in Syria**

James II did not confine his exploits to Egypt alone; he also spent time warring in Syria.

The time he spent in Syria will be the subject of two speeches by Dr. John Lundquist, who has directed an archaeological excavation at Tell Qarqur in Syria since 1983. Both speeches, on Wednesday and Friday, are at 7 p.m. in 312 ELWC.

Lundquist, who is chief of the New York Public Library's Oriental Division, will speak Wednesday on "The Battle of Kadesh on the Orontes River." The speech will be preceded with slides and unpublished information from Peter Parr of the University of London, who is excavating at the Kadesh site.

## Be Original For Valentine's Day

If you have been thinking about purchasing an engagement set, NOW is the time and Goldsmith Co. Jewelers is the place. Goldsmith's manufactures their own original line of engagement sets, so if you not only set her apart from the crowd, you also save money. Come in today and make her Valentine's Day original.

Nancy Andrus battles for position against New Mexico State player. She had four points and four rebounds in ten minutes of play.

## Cagers make comeback, thump New Mexico State

By STEPHEN BINGHAM  
University staff writer

The BYU women's basketball team entered the game Tuesday night like an old basketball flat, but got pumped up in the second half to defeat New Mexico State 95-55 in the Marriott Center.

This was the Cougars first conference game of the season as they work to gain their third straight conference championship.

Going into the locker room at half-time the Cougars were not only on the low end of the score board, 41-36, but were being out rebounded 30-20.

"Rebounding is just a matter of making up your mind," coach Courtney Leishman told his team at halftime.

"We came out in the second half with our minds made up and were able to turn things around," said Leishman. In the second half the Cougars out rebounded the Lady Roadrunners 19-15.

Another area of pleasure for the Cougars in the second-half was shooting percentage. In the first-half BYU shot a poor 44 percent from the field. They were able to raise that to 53 percent

by games end.

"They came ready to play," said Leishman of the Lady Roadrunners. "They know in order to get conference honors they have to beat us. They are a physical team and they showed that tonight."

When asked to name an outstanding player for the game Leishman started going down his roster. "I'm not trying to be facetious," he said, "but everyone played an outstanding game."

Both teams had five players score in double figures on the night. Leishman was especially pleased with Karina Zapata ending up in that category with 10 points. "She is the one we need the most on the floor," said Leishman. "She is the glue, the hub, what we need to roll. Tonight we came out more offensive minded."

Cathy Nixon also helped keep the team together as she hit four critical baskets in a three minute stretch in the second half to help turn the game around. She ended the game with 20 points.

Tresa Spaulding led the Cougars in scoring with 30 points and eight rebounds. Other Cougars in double figures were Tanise McIntire (16) and Judy Hare (12).

## Gymnast has strong family support

Hansen stresses importance of unity

By KERRY O'BRIEN  
University Sports Writer

Some say she looks like Kathy Johnson, the well-known U.S. gymnast — tall, thin, and blond — but she's Gina Hansen, one of BYU's premiere gymnasts.

Hansen, a sophomore from Carmichael, Calif., is the only girl in a family of four children. She has two older brothers who are both attending BYU.

Hansen also has a younger brother who has been the victim of muscular dystrophy all his life. "My younger brother and I are really close, we always have been," said Hansen. "I think he's a bit clumsy, especially in the gym. He's always been so positive and that's helped me out a lot."

Hansen also maintains a strong relationship with her parents. "After every meet I really look forward to calling my parents to tell them how we did. It's kind of a tradition, I guess," said Hansen. She added that the phone call was when she broke the school record last year in the floor exercise.

With such close family relations, it's no wonder she stresses the importance of team unity. "Team spirit means so much to me. It's a great feeling to know that everyone on the

team supports me," said Hansen.

It's important that the team is close because they are with each other so much. Practice is daily from noon to 3 p.m. Hansen said, "The best thing about playing a sport, beyond personal team success, is the friends that I've made. We're (the gymnastics team) very close to each other."

As with many athletes at BYU, Hansen doesn't have time to do much else but homework and, of course, gymnastics. "I know that I have missed out on a lot of social things, and sometimes I wish I could be more involved. But it all pays off when I compete," she said.

And Hansen is quite a competitor. She leads the team in the vault, bars, and floor exercise. In a meet in Boise, Idaho, this season, she boosted the team with a great vault routine, and later, led her team to a victory.

Last year, Hansen, then a freshman, won five consecutive meets. However, in the sixth meet she hyperextended her knee and was unable to hit her peak for the rest of the season.

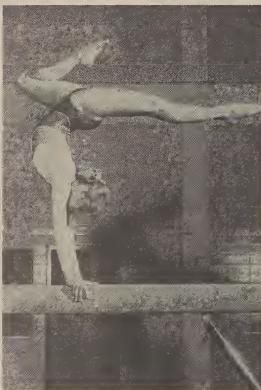

"At the beginning of the season, I didn't feel too strong. But now, after our first meet, I feel confident about what I'm doing and I'm ready for the rest of the season," said Hansen.

### Capener receives WAC honors

LITTLETON, Colo. (AP) — BYU junior guard Bob Capener was named the WAC basketball player of the week.

League officials said BYU has put together an eight-game winning streak over the last 15 days, and Capener was a big reason the Cougars were tied for first place in the league with a 6-2 record.

Capener connected on 23 of 39 shots from the floor and four of five from the free throw line as the Cougars forged their longest winning streak since the 1979-1980 season.

Gina Hansen performs on the balance beam. This is her second year of competition at BYU, where as a freshman she won five consecutive meets.

## Chicago faces obstacles for repeat championship

NEW ORLEANS (AP) — The Chicago Bears, who dominated the National Football League this season en route to their first championship in 22 years, are talking about turning success into dynasty.

They might ask the San Francisco 49ers how quickly a dynasty can turn into disappointment.

A year ago, after the 49ers routed the Miami Dolphins 38-16 to complete their own super season, people were trying to figure out how anyone could stop Bill Walsh's offense of the '80s. This year, the 49ers stopped themselves, barely making the playoffs with a 10-6 record, then losing to the New York Giants in the NFC wild-card game.

This year, the only difference is that the unstoppable force was the Bears' "46" defense, which held three playoff opponents to 10 meaningless points.

"We're the best of all time, no question," strong safety Dave Duerson said. That defense was the way in Chicago's 46-10 demolition of New England Sunday.

"We're the best franchise in," said wide receiver Willie Gault. "We're to be the team of the decade."

And Coach Mike Ditka, while eschewing dynasty talk, said he thinks the Bears can become even better.

"I think we can improve," he said. "I think we can become more formidable on offense and get stronger with our backups at some positions."

Improve or not, the Bears face some formidable obstacles — not the least of which is history.

Since 1980, when the Pittsburgh Steelers won their second straight Super Bowl and all-time best fourth, no NFL champion has repeated. In fact, only the Washington Redskins in 1982 and 1983 won the Super Bowl two years in a row.

And while the Bears are one of the younger teams in football, they do face some obstacles en route to their second straight title.

One is injury — Chicago had the good fortune to get through 1985 without losing any key players for longer than a few games.

Injury-prone quarterback Jim McMahon did miss all or part of five games with a back injury. But the offensive and defensive

lines stayed healthy and so did such key players as running back Walter Payton and middle linebacker Mike Singletary, without whom the Bears' efficiency would plummet.

In fact, the most serious injury to a starter came in the Super Bowl, when Leslie Frazier hurt a knee that Ditka said will require surgery.

Then there are contract problems of the kind that can upset the delicate mental balance of any team.

Todd Bell and Al Harris, starters in 1984, held out for the entire season. Ditka said that if they came to terms, he would welcome them back.

But the coach, despite the overwhelming victory, was in a trying mood at his news conference. He said that Bell and Harris would have to give up their jobs from Duerson and Wilson, Marshall, who replaced them.

"This may be the biggest moment in Chicago Bear history to date of part that and let it go by the wayside for a few dollars, I don't conceive it," Ditka said. "They made the decision. You play the people you have. You're loyal to the people you have."

The Chicago front office also must negotiate with All-Pro defensive end Richard Dent, the Most Valuable Player in the Super Bowl. Dent, an eighth-round draft choice three years ago played this season for \$90,000 and at one point threatened to boycott the Super Bowl in an effort to get his contract renegotiated.

The Bears may also face the loss of defensive coordinator Buddy Ryan, architect of the "46" defense, who is a candidate for the vacant head coaching job in Philadelphia.

But most important, having won once, they may not be able to muster the intensity to win again. That's the factor that other coaches, including San Francisco's Bill Walsh, have cited in explaining why they don't repeat.

Ditka said as much Monday.

"It's tough to repeat," he said. "You work very hard to get to the top. Then you look down and ask, 'Was the price you paid to get here worth the reward?' If it was, you can get there again, don't think at this point you can say you can or you can't. We'll look at it next year and know."

## School under fire, suspended for game

MADISON, Wis. (AP) — Three Minnesota basketball players charged with sexual assault have been ordered to appear at a preliminary hearing in circuit court Feb. 6.

In Minneapolis, meanwhile, the university has decided to resume the sport after a one-game hiatus over the scandal.

Judith Hawley, assistant Dane County district attorney, told a court hearing Monday that Jim Dutcher, who resigned Saturday as Minnesota coach, apparently was unaware of his players' whereabouts after a basketball game.

"With all due respect to Mr. Dutcher, he apparently wasn't keeping particularly good tabs," she said.

An 18-year-old Madison Area Technical College student says she

was subjected to various sexual acts early Friday at the Madison hotel where the Minnesota team was staying after a Thursday game against the University of Wisconsin.

Minnesota suspended the sport for one game Sunday, but university President Kenneth Keller said Monday that after much agonizing, he had decided to reinstate basketball. At the same time, Keller named former assistant Jimmy Williams the new coach.

"My personal reaction is horror, and disgust and some amount of despair that we, as an academic institution, have created the environment in which that can happen," Keller said.

However, he said, it was not fair to penalize the remaining players on the team by discontinuing the sport.

# Johnson has father's determination

*His goal is national honors*

By JORDAN COX  
University Sports Writer

The common denominator for Paul Johnson, the student and swimmer, is a dedicated father who instilled determination and a competitive spirit as he grew up.

Johnson's father was a five-sport letterman in high school and has seen his share of competition. He played basketball for Weber State, and could have played baseball for the Pittsburgh Pirates but instead was drafted to the Korean War.

"He has excelled in everything he's done," said his father, "but in my opinion, as far as being great, it's Paul and his two brothers," said Johnson.

At 14, Johnson was ranked seventh in the nation. In 1980, his senior year, he was a Senior National Finalist, a high school All-American and ranked 18th in the nation. Here at BYU, he holds three WAC titles in the 200-meter butterfly and has been an All-American.

His accomplishments have not come without hard work and sacrifice. Johnson has taken care of the hard work while his father has sacrificed a great deal to get his son the

best possible training. Johnson and his family moved down to Mission Viejo, Calif., from Sacramento towards the end of his junior year to train with world class coaches and athletes. His father was able to take a six month sabbatical from his position at a local college to make the move.

"He was always there to give me support," said Johnson. "He was always driving me throughout the state of California so I could compete."

During his senior year, Johnson was alone in Mission Viejo. His family moved back to Sacramento; however, his father flew down every week to visit Paul.

Paul was called to serve a mission to Frankfurt, Germany, after his freshman year. Although he returned very much out of shape, he refused to keep that from holding him back.

"The norm has been not to do well when you get home," said Johnson, "but I feel my mission made me stronger."

Since Johnson has taken the WAC title in the 200-meter fly three years, his main goal is to do something nationally and win the WAC again.

Paul Johnson, BYU swim team standout holds three WAC records in the 200-meter butterfly. He said his father was the underlying reason for all of his success.

Universe photo by Brian Heckert

## Packers' Hornung finally makes Hall

CANTON, Ohio (AP) — Paul Hornung, whose Golden Boy image was tarnished in the 1960s when it was disclosed he had bet on NFL games, finally made it to the Pro Football Hall of Fame on his 15th try. Fourteen times previously, the former Green Bay Packers halfback failed to get enough support to the Hall.

But Tuesday, when the results of this year's voting were announced, the votes were there, and Hornung was elected with four other former National Football League greats: quarterback Fran Tarkenton, halfback Doak Walker, and defensive standouts Willie Lanier and Kent Houston.

Hornung was surprised at ceremonies next summer.

Hornung's one-year suspension in 1963 for betting on his own team had been blamed for keeping him from the Hall until now. Last year, he was elected to the Pro Football Hall of Fame for his exploits at Notre Dame.

Attempts to reach Hornung for comment Tuesday were unsuccessful.

Those who were contacted made no secret of their joy.

"I'm elated," said Houston, who played as a defensive back for the Houston Oilers and the Washington Redskins.

"It's fantastic," said Willie Lanier, linebacker for the Kansas City Chiefs, saying notification of his induction gave him a "very rewarding and refreshing feeling."

The selection committee is made up of one media representative from each NFL city plus a 29th member from the Pro Football Writers Association. To be elected, a player must receive support from about 82 percent of those voting. Rules call for the election of four to

seven new members to the hall each year.

Hornung became the eighth defensive back from the modern era and the fifth safety to win induction. In 14 seasons, he intercepted 49 passes and established an NFL record by running nine back for touchdowns.

Lanier was the second Kansas City Chief player after Bobby Bell to be elected to the Hall as a safety linebacker from the modern era. In 11 seasons, he intercepted 27 passes for 440 yards and two touchdowns.

Hornung became the 10th member of the 1961 Green Bay Packers to be inducted into the Hall. A Heisman Trophy winner at Notre Dame, he was a two-time NFL MVP. From 1959 through 1961, while playing for Green Bay Coach Vince Lombardi, he led the NFL in scoring for three consecutive seasons.

Tarkenton became the first player with any significant playing time with the Minnesota Vikings to gain entry to the Hall. He was a key factor for the New York Giants. In the '70s, he led the Vikings to three Super Bowl appearances, but never emanaged to take them to victory.

Over his 18-season career, he amassed NFL career-record passing totals of 6,467 attempts and 3,926 touchdowns.

Walker, who played six seasons with the Detroit Lions in the 1950s, made the initial list of candidates as a nominee of the Old-Timers Committee, which studied players with qualifications dating back primarily before 1961. He had 1,520 yards rushing and 2,539 yards receiving.

Len Dawson and Don Maynard failed to make the final cut after being among the seven finalists.

## Pats' Berry reveals team drug problems

FOXBORO, Mass. (AP) — The New England Patriots have been dealing with a drug problem on the team since last year, including the testing and successful removal of two players, Coach Ray and Player and Trainer Brian Holloway.

"We were not treading water," Berry said of the Patriots' response to the problem. He said that drug use was a serious concern that had to be addressed, but was not a major problem that ever affected the team's performance.

His comments came at a news conference one day after the team announced it would submit to voluntary drug-testing. That decision came after published reports that four starters were among players on the American Football Conference championship team who frequently used cocaine and marijuanna.

Berry said reports that 12 players are involved in drug activity, but he would not say how many players might be using drugs.

The NFL Players Association said it would file an unfair labor practice charge over the decision to test the players for drugs.

Assistant Player Representative Ron Wooten said team members agreed in a recent meeting to be the first National Football League team to undergo voluntary drug testing because of their special respect for Berry.

Wooten said the testing plan was not well received by the players association.

"The union's position is that there's a way to handle the problem in collective bargaining. We don't feel that overall that is the way to attack this problem," he said.

"I've fought in the middle. I'm certainly more behind the program here than the union in Washington," he added, but said, "We had to act immediately" instead of waiting for the union to become involved.

Berry said he confronted the players with the issue at a two-hour meeting following the team's 46-10 Super Bowl loss Sunday in New Orleans. Wooten said 95 percent of the team attended the meeting and 86 percent of them voted to be the first NFL team to accept voluntary drug testing.

Gene Upshaw, executive director of the players association, said the union would file its unfair labor practice charge over the decision to test the players for drugs.

Despite his success as an amateur — he won a world title as well as an Olympic gold medal — there were questions about heart. But it wasn't a matter of heart. It was a matter of style. Biggs liked to move from side to side and backward, coming on his jab to pile up points.

Biggs' latest victory was a solid one, over a former contender who has lost to the likes of Mike Weaver, Pinklon Thomas, Gregie and Tim Witherspoon. Of course, in several recent fights, his look had liked a fighter just going through the motions.

"Quick Tillis is a man with many faces," Biggs said. Tillis had his fighting face against Biggs.

After the fight, Lou Duva, Biggs' manager, said Tillis, who has a 31-8 record, told him, "Lou, we thought we were going to put one over on you."

The 28-year-old Tillis, always considered especially dangerous in the early rounds, opened up fast and caught the 25-year-old Biggs with some solid shots.

"He ain't got a glass chin," Tillis said.

While Biggs had a streak of six straight knockouts snapped, he showed aggressiveness and a willingness to mix it up without neglecting defense. He also threw a good left hook and used his right hand much more than he did as an amateur. He hurt Tillis on several occasions, especially in the third round.

Biggs didn't use his vaunted jab as much as in past fights, but he said he had jimmied his left shoulder and hurt a knuckle on his left hand while training. He shook off these nagging injuries, something top fighters do.

Despite his success as an amateur — he won a world title as well as an Olympic gold medal — there were questions about heart. But it wasn't a matter of heart. It was a matter of style. Biggs liked to move from side to side and backward, coming on his jab to pile up points.

"Quick Tillis is a man with many faces," Biggs said. Tillis had his fighting face against Biggs.

Chris Brown defeated Weber State's Terry Norman (9-2) in the consolation championship, capturing third place at 118.

The Cougars also placed third at 150 with Jon Evans and in the heavyweight competition with Doug Rawlinson who scored four falls in the tournament. Freshman Mark Willis placed fourth at 126.

Wyoming won the meet with 163 points, followed by Utah State with 140%.

BYU's Jess Christen and Morgan Woodhouse placed second at 134 and 142, respectively.

## LIFESTYLE

Graciela Torino, choreographer and dance instructor at BYU, had always dreamed of devoting her life to dance. Now, she says, that dream is realized.

## Y choreographer fulfills dream

By NELDA HOGGAN  
University Staff Writer

Graciela Torino, choreographer of "In Memorium" for Ballet in Concert, had dreamed as a young woman of devoting her life to dance. When her father died, however, she thought her dream had died also.

Torino, a native of Argentina, had graduated with a gold medal from the National School of Dance in Buenos Aires with an emphasis in ballet and folklore. She wanted to continue to study dance, but because of her father's death, she knew she must work to help support her family.

She took a job as an airline hostess with an international airline. She worked with the airline for four years, which gave her a chance to travel to New York frequently. With each returning visit, Torino became more impressed with the freedom American citizens enjoyed.

Torino said it was quite different from the life she knew while growing up in Argentina. "Under the totalitarian regime of Peron, there was much

persecution and abuse of human rights and private property, and my family suffered a great deal for it."

While she was working for the airlines, most of her immediate family passed away. So, she decided to come to America to find freedom and to study dance.

"America," she said, "was not only an opportunity to progress in dance, but was also a possibility to achieve a more creative way of life."

Torino moved to New York, where she auditioned and received several scholarships that enabled her to attend the Martha Graham School of Dance.

During this period, Torino took a course in economics and freedom offered by the Foundation for Economic Education. She became impressed with the writings and views of a member of its board of directors — Ezra Taft Benson.

In 1976, Torino moved to Spokane, Wash., to help with community arts work. While there, she performed in a musical with other dancers who were members of The Church of Jesus Christ of Latter-day Saints. In time they became good

friends, and she learned much about the Church. "At this time I learned that the author I admired so much, Ezra Taft Benson, was the president of the Quorum of Twelve of the Mormon church," Torino said.

Torino was so impressed with President Benson's integrity that she decided to investigate this church he was so involved in. Torino was baptized in 1979.

Since then, she has made much progress in the study of dance. She is the assistant director of the Laura Foreman Dance Co. and taught at the New School for Social Research.

In March 1985, Sarah Lee Gibb, director of the Modern Dance department, asked Torino if she would teach at BYU. Torino accepted the position and started in September.

"I have a sense of fulfillment and thankfulness to the Lord for having given me the opportunity to overcome hardships and enjoy a fuller way of life, artistically and personally, while channeling this experience through my teaching at BYU," Torino said.

## Photographer proud of Indian heritage

By JULIE A. FENTON  
University Staff Writer

The January/February issue of Communications Arts magazine features BYU Indian educator and photographer.

Howard T. Rainer, a Taos Pueblo Indian, is the assistant director of American Indian Services. The magazine features 18 of his photographs, representing contemporary Indian life.

Communications Arts is a magazine for professional graphic artists, designers and photographers. Jean Coyne, executive editor, said Rainer's work was chosen because of his "special unique interest" that would appeal to our readers."

"I feel honored that I can represent our Indian people and portray them with the dignity and respect they rightfully deserve," said Rainer.

Rainer has been working with the Indian people for more than 20 years. Many of his subjects are senior tribal members. For many, it is the first time they have been photographed. The pictures represent reservations all across the United States.

"There's a real strong spirit in these people — a magnetism; something about the countenance and fea-

tures. You just have to take a second look. I see so much majesty before me, so much goodness, humility and strength, that my camera shakes."

The dual role of endorsing the white man's education while simultaneously preserving his heritage, presents Rainer with a challenging task.

"I realize that the American Indian today is in conflict with the white man's culture," he said. "But I feel my contributions as an educator and a concerned photographer can play a vital role in bringing understanding and motivation to the next generation."

As part of his work at BYU, Rainer travels to reservations around the country delivering his message to Indian youth.

Rainer said some critics might find his work less imaginative than other work because all his photos are done in black and white. His rationale for doing so is straightforward.

"How can I accurately document my people in the plumpness of black and white? You can't visualize the power and excitement of my people without the use of color. Indian people are not afraid to wear vibrant colors, and color is used in everyday life in dress, ceremonial and individual apparel."

## First of the baby boomers fits well into 'Yuppie' mold

HADDON HEIGHTS, N.J. (AP)

— Kathleen Casey Wilkins, "America's original baby boomer," said Sunday that she was part of "an anxiety-ridden generation."

Wilkins was born in Philadelphia, one second after midnight Jan. 1, 1946, and her arrival was listed in local newspapers as the city's first of the year.

"Though no one knew it at the time, it was also the first of the baby boom," according to a story Monday's issue of *Money* magazine, which looks at baby boomers and their finances as the first of the boomers reach 40. "After all, the life of America's original baby boomer replicated that of millions of women of her era."

The magazine said 76 million people were born during the baby boom, from 1946 to 1964.

Being a baby boomer is a double-edged sword, said Wilkins, the mother of two teenage daughters.

The generation to come may be look back on it and say, "We learned from the boomers, I wouldn't want to

have been born in another time," she said in a telephone interview. "But I think there's a lot of anxiety in the boomers. We're an anxiety-ridden generation."

Wilkins, 40, said she fit some of the stereotypes attributed to her generation.

She works out three days a week, plays tennis, drives a 1985 Mercedes-Benz, avoids red meat, travels to Europe, owns a food processor and is working toward a master's degree in business administration.

"I appreciate the finer things," she said.

However, she said she objected to the obsession with material things that is reported to be in vogue among some of her contemporaries.

"Money has surrounded the baby boomers," she said. "They equate with some kind of happiness. They're finding out that this is not so. I think they've lost sight of what's really important. Relationships we have with other people are the most important thing in life."

### Theater goers should note change in site

# BYU Singers' to showcase preview

The BYU Singers will present a preview of their annual Midwest tour in a special concert program to take place Thursday.

The 41-voice choir will perform at 8 p.m. in the de Jong Concert Hall, HFAC.

"We have designed the concert around the theme of developing ourselves to reach toward our goals, and the songs we are performing reflect that theme," said Ronald Staheli, director of the singing ensemble.

The singing program will include an unexpected range of music styles. The variety of old and new songs will include Italian renaissance selections, German baroque numbers and 20th-century French impressionistic chansons. "We are even presenting some country songs, which is quite a departure from the music our audiences expect to us," said Staheli.

"A long time ago I found an old shepherd's pipe and I liked it very much because I really liked it. I thought it would be useful someday. It seems like something that would come out of Scotland or Utah," said Staheli. "The other country selections reflect different areas of the nation."

The director said he likes to block his production numbers to help the audience visually as well as aurally. "I try to make the music more meaningful by rearranging my singers according to what they are singing to make the music easier to follow," said Staheli.

Following the BYU concert, Staheli will showcase his singers.

Tickets for the performance are available through the Music Ticket Office, HFAC.

BYU's University Singers will present a special preview of their upcoming Midwest tour Thursday at 8 p.m. in the de Jong Concert Hall, HFAC.

## Verona provides gateway into past: immortalizes legends of romance

Photo courtesy: Italian Government Travel Office  
The renowned Roman Arena dominates Verona's city center. The city, better known for its associations with the legendary Shakespearean lovers, Romeo and Juliet, offers the visitor a glance into the past, as well as a glimpse of the present. Here, the Roman Empire, the Middle Ages, the Renaissance and the 20th century all coexist.

ear and anxiety. These words describe the feelings of many students when forced to deal with life's common situations.

That is on the way, however. The Counseling and Development Center will begin two new programs this week — the Creative Dating Service and the Adjustment to Life Panels.

According to Jonathan Chamberlain of the Counseling and Development Center, many eligible men and women on BYU's campus never make dates. Often, academic studies are given as a reason for lack of involvement, but many students have expressed fears that prevent them from

the series will address students' concerns with discussions and presentations from a panel of psychologists.

The Creative Dating Series will meet each week at 11 a.m. in 173 SWKT. This week's topic will be "Risking and Handling Anxiety."

The Adjustment to Life Panels, which will be presented three times this semester, will deal with topics including feelings of inferiority, depression and anxiety, and fear.

Each panel will be composed of two faculty members of the Counseling and Development Center — a bishop of a BYU ward and a faculty member from the Psychology or Social Work Department.

## New skiing technique gaining in popularity

By MICHELLE MELENDEZ  
University Staff Writer

Pioneers, adventurers, and explorers. From the backhills to the very top of the mountain, telemarkers are taking over the skiing world. David Webb, a certified telemark instructor and director of Outdoors Unlimited, said that telemarking is beginning to dominate the skier's preference.

"Telemarking is starting to appeal to many skiers. It's a position of descending a slope and for making turns. The balance is directed at the legs and feet instead of the upper body, which allows for more control," said Webb.

In order to make the telemark turn, nordic skis and bindings must be used. The skier's heel is fixed in the cross country ski, whereas the back of the boot is not hooked to the ski.

"This gives you a great advantage over alpine skis. Nordic can do any alpine turn besides its own, but alpine can only do alpine turns," Webb said.

But that doesn't mean telemark is any better than alpine, just different.

There are three main types of telemark turns. There are the slalom (downhill), the nordic (cross country) and the jumping. Telemarking is used in the jumping and nordic because it provides more control in powdery conditions.

Alpine skiing didn't even become a

### Dr. Heimlich does maneuvers in Utah snow

ALTA (AP) — Dr. Jay Heimlich is best known for the abdomen-jarring thrust he developed to save choking victims. But here, he's known for showing up on a snow slope to perform a smoother maneuver through fresh Utah powder.

The Heimlich maneuver is credited with saving thousands of lives annually almost since the time medical researchers began making the technique widely known in 1974.

Heimlich said three Utahns played an important part early on in winning international acceptance for the maneuver: Salt Lake City's Health Department Director Lee Gibbons; Utah Department of Health Director Suzanne Dandoy, formerly director of the Arizona Department of Health Services; and state Health disaster coordinator James L. Hendrickson.

Heimlich said three Utahns played an important part early on in winning international acceptance for the maneuver: Salt Lake City's Health Department Director Lee Gibbons; Utah Department of Health Director Suzanne Dandoy, formerly director of the Arizona Department of Health Services; and state Health disaster coordinator James L. Hendrickson.

sport until the late 1930s, when the first chair lift and ski resort was built in the U.S. In Sun Valley, Idaho, it didn't become popular until a skier would only go one way — down. It was very popular until the 1970s, when people started to look at different types of skiing.

"This is when they turned to cross country, or nordic skiing. Many people were disillusioned by the high cost of alpine skiing. Because of this shift in tastes, the price of a lift ticket has gone one percent each year of cross country skiers," said Webb.

Webb said that cross country skiers on general touring equipment have rediscovered the joys of telemarking with its swooping action and powerful control," and that friendly competition has evolved into national race circuit. "Many skiers are using telemarking exclusively at alpine resorts."

Webb said some people are tired of the fashion scene, the trends, and the lines that are all inherently part of the alpine ski resort scene.

Despite this, Webb also said telemarking is developing into a fad. "It has evolved into two groups: those who telemark at a resort exclusively and those who ski just as often in the back country."

Outdoors Unlimited will offer telemark ski clinics on Saturdays during February and March.

## Law permits recovery of child support

By HEIDI CRAIG  
University Staff Writer

Child support payments have been a serious problem in recent months in Utah County. The problem has been getting the absent parent to pay the agreed amount of child support and pay on a regular schedule.

The Bureau of Child Support Enforcement expanded their staff this past year to accommodate the growing number of cases of negligent child support in Utah County.

Lee Stevens, team manager of one of the three child support collection teams, said, "The increased number of staff has helped a great deal in our effectiveness and has increased our ability to work our files." This has increased the success rate of our support recovery.

"The recovery services have had an estimated 30 percent success rate in recovering unpaid child support," said Stevens.

The area covered by the Bureau is responsible for approximately 8,000 cases of which 1,500 now pay on a regular basis and 1,600 are currently in arrears, he said. The remaining 5,500 cases of absent parents not paying are being investigated.

"Most of these guys that don't pay are either out of the state or chronically unemployed. They just don't take their responsibilities seriously," said Stevens.

In August of 1985, the state legislature passed a law making it easier for child support recovery organizations to collect unpaid child support. The new law allows the recovery organization to go straight to the employer of the negligent payer and ask them to take the given amount for child support out of the paycheck of the absent parent.

This has increased the success rate of the program and has made more employees of the Bureau of child support available to locate the out-of-state parents who have been negligent in their support payments.

Stevens said the new law has been very beneficial, "because previously we had to garnish the paychecks of negligent payers, and that required so much paperwork and red tape."

The bureau has revised many of its previous rules, making it easier for those in need of the services to utilize them. The fee required for the collection of support payments has been omitted by the legislature to make certain that all those who need the Support Bureau's assistance would be able to make use of it.

Currently, the state is supporting 60 percent of the single parents not receiving child support from the absent parent. The bureau hopes that its increased staff and the new laws forcing child support will decrease the number of parents dependent on the state.

"If everyone paid their child support, we'd be out of a job, but at least people would be facing their own responsibilities," said Stevens.

## Utah donates more blood

By DAVID W. STAUB  
University Staff Writer

Blood bank officials nationally are blaming the fear of AIDS for the recognizable decline in blood donations. Although the fear is unfounded, it is keeping potential donors away, said Gilbert Clark, executive director of the American Association of Blood Banks.

Locally, blood donations are on the rise said Karen Tribbitt, Resource Recruiter for Utah Valley Regional Medical Center (UVRMC). "Our blood collections are increasing in Utah Valley," she said.

Five years ago, Tribbitt made a goal that UVRMC would collect 500 units of blood per month. That goal is consistently reached by the hospital due to the many blood drives by UVRMC and the community's community education. "We are constantly informing and educating people to the fact that AIDS cannot be received through blood donation," she said.

Tribbitt said AIDS is not a real concern in this community. The residents of Utah County "are living a higher lifestyle than most communities and are therefore not as susceptible to AIDS."

Even if an AIDS victim were to donate blood, UVRMC performs a series of tests on all received blood. These tests would identify any transmittable diseases, she said.

HTLB3 is one of the tests performed that would identify any such disease. Once identified, that blood unit would be disposed of.

UVRMC currently has three blood drives per week. Those drives are usually at LDS Stake Centers, businesses, high schools, universities and colleges. Those drives combine with the donations given by the community of Utah County with the blood needed to properly service open heart patients, accident victims and other patients.

The fear of AIDS may be low in Utah County, but it is not exempt from AIDS victims. "Last year UVRMC had two AIDS patients," said Tribbitt.

The strict regulations governing donated blood and the ongoing education process about AIDS should give Utah County residents peace of mind in donating and receiving blood, said Tribbitt.
